AGENDA
Blue Expert Certification Training Camp
Bluenotes GLOBAL 2023 at The Brown Hotel
July 28-30, 2023

About BEC Training Camp

Blue training focuses on applications of Blue: course / learning evaluations, 360s, and single topic surveys. This training moves beyond those applications to create experts that can use Blue as a powerful feedback-gathering tool for any occasion. The training's primary mission focuses on Blue's ability to create a variety of projects and does so by working with scenarios to develop evaluations that showcase all of Blue's Project Types.
Participants in this Blue Expert Certification training camp will be able to:

- Conceptualize and plan a project <u>before</u> opening the software to build it
- Understand the features and limitations of each project type
- Learn how different Project Types can be used for the same scenario to effect different results
- Visualize data needs and create datasources
- Design, build, and troubleshoot five different projects in Blue

Additionally, the training includes time to review any remaining questions regarding prior trainings, advanced question types and their creation, building projects with multiple languages, and using the tools provided for multiple language projects to benefit Blue Administrators creating single language projects.

Location

- The Brown Hotel
  335 West Broadway, Louisville, Kentucky 40202
  Room: Citation A, 1st Floor

Instructor

- David Norenberg, Product Training Specialist, Explorance
